Our clients

Solution stack

Secure solutions

Secure store

Advanced Data Analytics Made Simple

- Robust query engine
 - Write, edit and share ad-hoc reports on the fly with full drill down visibility and CCTV integration capability
- Risk score-carding
 - Identify trends and geographical 'hotspots' for key performance indicators
- Enterprise support
 - Segregate system access and function by user role
 - Create custom dashboards to visualize performance
 - Access the Secure Alliance client risk dictionary of high ROI scenarios

Secure pharmacy

Profit Protection for Pharmacies

- Data silo consolidation
 - Load various data types from across the business to a single analytics interface
 - Dispensing systems
 - POS
 - Inventory etc.
- Enterprise or modular install
 - Differentiate consolidated system experience by user roles (i.e. LP, Ops Compliance etc.) or bring in a smaller related group of feeds to solve for a specific pain point
- Advanced analytics
 - All the query, dashboard and report functionality of Secure Store.

Secure refund management

Real Time Refund Authorization

- Sub second decision making
 - Integrate with POS to authorize or pend refunds in real time *or* –
 - Install as a standalone decision station (i.e. customer service counter)
- Flexible rule setting
 - Implement and test custom rule-sets
 - View rule violations in a dedicated exception queue
- Integrated analytics
 - Link directly to Secure Store purchase history to research pended items.

Information capture (ICMS)

Anytime Data Capture from Any Device

- Configurable 'smart forms'
 - Context aware decision tree entry and fuzzy logic linking
 - Touch and drop form designer
- Scheduling and alerts
 - Real time alert and scheduling capabilities
 - Calendar and event based triggers
- Dynamic reports
 - Visualizations, drill downs and ad-hoc search
- Multiple deployment options
 - Capture data using existing templates (i.e. Case Management, Safety, Loss Prevention Audits, Risk Management etc.) or create your own.

Real time integration (RTI)

Enterprise Integration: Faster and Simpler

- Maximize existing integration investments
 - Connect centralized and distributed systems to a federated ESB
 - Rapidly compose web services
 - Utilize 'out of the box' adapters or generate new ones
- Multiple integration patterns
 - Managed file transfer, ETL, real-time messaging, complex event processing, conventional batch processing, on-premise to cloud smart bridging etc.
 - RTI is currently supporting a variety of business cases from reservation status notifications, mobile payments, perpetual inventory and more.

Sysrepublic consulting

The Evolution of the Profit Protection Analytics

Sysrepublic consulting services work with a variety of retail clients to assess opportunities for driving profitability beyond traditional loss prevention exception reporting. Some of our services include:

- Financials KPI Assessment
- POS Systems Testing and Threshold Analysis
- Price Accuracy Reviews
- SOP Evaluations

As part of this service we deliver profit improvement estimates and industry comps within a tangible execution strategy
